

LAREDO DESKTOP ANYWHERE

For users, Laredo Desktop will remain the primary tool for making search queries, but now users also have mobile searching capability with Laredo Anywhere. Using any mobile device that has internet connectivity, a user will be able to search records and view document images – **Anywhere**.

Listed below are a few of the major differences between the Laredo Desktop tool and the Laredo Anywhere tool.

LAREDO DESKTOP

- **Multi-field Search Entry** - User enters criteria within different fields to perform a search.
- **Saved Searches** - User can create, save, and run frequent searchers from Laredo Desktop. User can also be notified via text or email of newly recorded documents.
- **Iris** - Allows user to create custom search lists for Party Names and Subdivisions.
- **Printing Options** - User can send documents to the Print Queue, which allows documents to be reviewed prior to printing.
- **Screen Resolution** - The user interface screen can now be fully maximized for easier viewing of results.

LAREDO anywhere

MOBILE SEARCH CAPABILITY

- **Single-field Search Entry** - User enters criteria into one search field, using a search phrase.
- **Saved Searches** - User will be able to run the existing Saved Searches from Laredo Desktop.
- **Mobile Function** - Enables searching on popular mobile devices (phones/tablets) with all internet browser applications (Chrome, Internet Explorer, Firefox, etc).
- **Printing Options** - User will be able to save the needed document as a PDF which can then be printed off at the user's convenience.
- **Screen Resolution** - The Anywhere screen has the ability to resize for any mobile device.
