Fidlar Technologies' remote, pay-as-you-go search program

Tapestry is Fidlar's web-based application designed for your general public searchers that may not be frequent enough to subscribe to Laredo. Tapestry will alleviate phone calls and traffic in the office by providing access, at a per-search charge, to your land records information over the Internet.

Tapestry users will access the program from Fidlar's Tapestry website, www.landrecords.net (which can be set up as a link on the county website if you wish). With Tapestry, users can access information from your county and participating counties in other states.

There is no software download required for Tapestry - all that is needed is a web browser. Tapestry utilizes a unique pay-as-you-go method in which searchers can pay with a credit card on Fidlar's secure internet site. Frequent Tapestry users also have the option of either opening a membership account with a credit card or taking advantage of our open account payment plan.
